

Environmental policy

Environmental and social considerations are integrated into the policies and principles that govern our business and reflect our commitment to sustainable growth.

Human activity can have harmful effects on ecological systems, climate and public health. Recognizing this, we are committed to reducing our environmental footprint and promoting environmental awareness. Our goal is to minimize our organisation's carbon footprint.

We will strive to identify and purchase environmentally preferable supplies and services for all our daily operational needs and for company events where economically feasible. Wherever possible we will strive to minimize pollution and waste, conserve energy and water, protect habitat, support renewable energy resources, buy environmentally friendly products, and encourage environmentally preferable transportation.

We aim to create lasting, positive change in the communities in which we live, work, and play. We recognise and respect the cultural, indigenous and heritage environments around us.

Leah Clark

Managing Director
